

CHANGES TO RULES AND REGULATIONS

1. There are many typo, grammatical, and wording changes in the document. These small changes have in no way changed any substance in the document. These ministerial changes are too numerous and inconsequential to be individually identified and thus will be incorporated in the document when adopted.
2. The entire document was reformatted for easier reading and reference.
3. The following changes are clarifications of existing rules and regulations or changes required by new laws that apply to HOA's. They are either identified as deletions or additions and must be approved by the Board of Directors. The table of changes below only contains these changes. Some owners may find the other changes, including those primarily ministerial, to be substantial. Owners should carefully review the actual document and not solely rely on this document, which is being provided as a reference and guide only.
4. UTV was added where vehicle reference was required.
